<p>GENANVENDELSE</p> <p>Hvad er forskellen på genbrug og genanvendelse?</p> <p>Svar: Genbrug er når tøjet bruges som det er. Genanvendelse er når tøj omdannes til nye fibre.</p> <p>Overordnet set vurderes det, at direkte genbrug er mere bæredygtigt end genanvendelse. Dette skyldes, at genanvendelse kan være meget energikrævende eller kræver intensive kemiske processer, og at genanvendte fibre ofte blandes med virgint materiale for at kunne bruges igen.</p>	<p>RECYCLING</p> <p>What is the difference between reuse and recycling?</p> <p>Answer: Reuse is when clothes are used as they are. Recycling is when clothes are transformed into new fibers.</p> <p>Overall, direct reuse is considered more sustainable than recycling. This is because recycling can be very energy-intensive or require intensive chemical processes, and recycled fibers are often mixed with virgin material to be used again.</p>
<p>VIL DU VIDE MERE?</p> <p>➤ HUSK! Kritisk kilderefleksion</p> <p><u>Bruger du ordet genanvendelse forkert? Her er fejlen, mange begår</u></p> <p><u>Waste Framework Directive - European Commission</u></p>	<p>DO YOU WANT TO KNOW MORE?</p> <p>➤ REMEMBER! Critical reflection of the source</p>
