## BÆREDYGTIGHED

Hvor mange danskere er bekymret for klimaet?

Svar:

Ca. 85%

Afhængigt af kilden

Størstedelen af danskere er bekymret for klimaet, men det kan være svært at gennemskue, hvordan man kan gøre noget.

Vi sender signaler om vores værdier til hinanden med vores tøj. Én ting, vi kan gøre, er derfor at anerkende værdien af at reparere tøj og bruge det i lang tid i stedet for blot at købe nyt.

## SUSTAINABILITY

How many Danes are concerned about the climate?

Answer:

Approx. 85%

Depending on the source

The majority of Danes are concerned about the climate, but it can be difficult to see how to do anything about it.

We send signals about our values to each other with our clothes. One thing we can do is therefore recognize the value of repairing clothes and using them for a long time instead of just buying new ones.

## VIL DU VIDE MERE?

- HUSK!  
Kritisk kilderefleksion

## DO YOU WANT TO KNOW MORE?

- REMEMBER!  
Critical reflection of the source
